

# TAF-PLAYMUSICMARKET

TEST AUTOMATION FRAMEWORK (TAF) UI AND API TESTING -  
[HTTPS://STAGE.PLAYMUSICMARKET.STORE](https://stage.playmusicmarket.store)

A staging site is a clone of your live website that is used for testing changes before making them live

**IULIA HOLOSTENCO**

**PLAYMUSICMARKET**

Otherwise the music forever stay in you

API

**FRAMEWORK:**  
"TESTNG", "REST-ASSURED",  
"SELENIUM", "LOG4J",  
"ALLURE" ,"LOMBOK"

MODEL

POJO

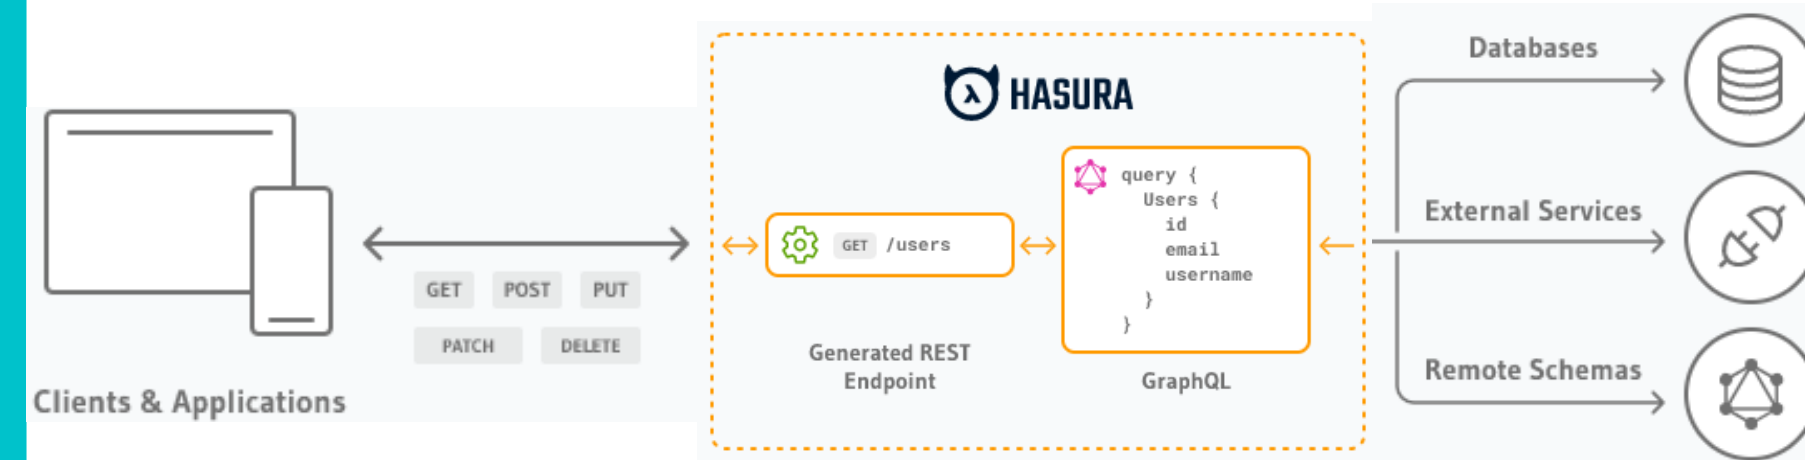

SERVICE

SPECIFICATION

UTILS

Back-end

- [Postgres/Hasura](#) for storing relational app data
- [Hasura backend plus](#) for JWT-based user auth
- [IPFS](#) for media storage and hash-based content addressing
- [Fastify](#) NodeJS api/app server

LoginApiTest

TEST CASE - API AQA  
TEST LOGIN

# UI TESTING

PROPERTY FILE FOR  
PASSWORD STORAGE

SELENIUM WEBDRIVER LAUNCH THE BROWSER  
WITHOUT CREATING A VISUAL BROWSER WINDOW

INITIALIZING THE WEBDRIVER OBJECT AS A THREAD LOCAL  
FOR PARALLEL TEST EXECUTION

USE IN TESTS: JAVA STREAMS

FACTORY PATTERN FOR TEST AUTOMATION

CREATING ALLURE REPORTS IN SELENIUM AND TESTNG

UI TESTING LOG MESSAGES

```
.addArguments("--headless")
```

```
ThreadLocal<WebDriver>
```

```
stream().map(WebElement::getText)  
        .filter(elementName -> e
```

✓ #1 testEditProfileEmptyCredentials	1s 791ms
✓ #2 testEditProfileWithCorrectCredentials	3s 578ms
✓ #3 testEditProfileWithinCorrectEmail	2s 415ms

# API TESTING

THE DTO PATTERN (DATA TRANSFER OBJECT)

USING POJO + LOMBOK IN REST ASSURED

ALLURE REPORT FOR REST ASSURED API

```
@Data
@AllArgsConstructor
@Builder
public class User {
    private final String email;
    private final String password;
}
```

Passed testLoginUserNotValidEmailPasswordRandomValues

Overview History Retries

# NOTE

I've built test automation tools and frameworks that can be used by any engineer to build reliable tests with great code coverage, aligned to company "PLAYMUSICMARKET" needs.

When creating the Test Automation Framework, I consider the following main points:

- To be able to create automated tests quickly by using appropriate abstraction layers
- The framework should have meaningful logging and reporting structure
- Should be easily maintainable and extendable
- Should be simple enough for testers to write automated tests
- A retry mechanism to rerun failed tests - this is especially useful for WebDriver UI and REST Assured tests
